

Make A Gallivant™ Habitat

You'll need:

- A Shoebox
- Playdough (the kind that stays soft)
- Stuff from nature (sticks, leaves, moss, etc.)

1. Cut down the corners of the shoebox, so you'll have more room.

2. Cover the "floor" with moss, leaves or grass.

3. Decorate with pinecones and straws of grass.

4. Pods of milkweed make great chairs for us! To make them stable put a ring of play-dough underneath.

5. You can also make toadstool tables and other things out of play-dough.

6. Perhaps make a little fence around the "patio" of popsicle-sticks, or paper?

Have fun! Let us know when you can move in.
